HOBBIES

PROFILE

In my role as a front-end developer, I blend technical skills with UI design to enhance user experience. My proficiency in front-end languages and frameworks enables me to build responsive and dynamic interfaces. Simultaneously, my keen eye for UI/UX ensures these interfaces are not only functional but also visually appealing and intuitive. This combination results in user-centric, engaging websites that are both aesthetically pleasing and highly usable.

PROJECTS

SongRates – Music platform

Live

Code

A music platform that allows users to rate and review songs. It is a full-stack project that includes a backend using Supabase and a frontend using React and TypeScript.

React

Typescript

Backend

VSCS Solar panels

Live

Code

A full UI redesign and website development for a global industrial solar enterprise in Bulgaria that is fully responsive and built with React and TypeScript.

Next.js

TypeScript
